Lesson 3: Drawing Shapes and Adding Text

✏️ Draw a line:

```
cv2.line(image, (0, 0), (200, 200), (255, 0, 0), 5)  # Blue line
```

◼ Draw a rectangle:

```
cv2.rectangle(image, (50, 50), (150, 150), (0, 255, 0), 3)
```

◯ Draw a circle:

```
cv2.circle(image, (100, 100), 40, (0, 0, 255), -1)  # Filled circle
```

📝 Add text:

```
cv2.putText(image, 'OpenCV!', (10, 100),
cv2.FONT_HERSHEY_SIMPLEX, 1, (255, 255, 255), 2)
```

🎨 Color format: Always (B, G, R). For example:

Red = (0, 0, 255)

Green = (0, 255, 0)

Blue = (255, 0, 0)

🖊️ Tip: Combine drawing with user input to create simple drawing apps or annotation tools.
